

2025 Dr. Daniel I. Kaufer Lecture: Lewy Body Dementia, Caregiving, and Advocacy

The Dr. Daniel I. Kaufer Lecture is an educational program that promotes and shares current research on Alzheimer's disease. This year's event is designed for Alzheimer's disease and related dementias (ADRD) researchers and professionals working in dementia care, including memory care providers, neuropsychologists, nurses, and social workers, as well as community members, care partners, and trainees. The event will conclude with a Q&A panel. Light refreshments will be provided. Free and open to all.

FEATURED SPEAKERS

Angela M. Lunde, MA,

is a co-investigator for the Outreach, Recruitment, and Education Core in the Mayo Clinic Alzheimer's Disease Research Center. Her work focuses on the emotional well-being and quality of life of people living with dementia and their care partners.

Brother John-Richard Pagan, MS,

has a background in clinical psychology. He is a Veteran, a monastic, a member of the Episcopal Ecumenical community, and an advocate.

About Dr. Kaufer

Daniel I. Kaufer, MD, was a renowned neurologist specializing in frontotemporal dementia and Lewy body dementia at the University of North Carolina at Chapel Hill

(UNC). His educational roots

began at the University of Wisconsin–Madison, where he received a bachelor's degree in molecular biology and zoology in 1983, and a medical degree from the UW School of Medicine and Public Health in 1988. Dr. Kaufer credited the University of Wisconsin with teaching him to think like a physician. Dr. Kaufer passed away on July 2, 2020, after receiving a sudden cancer diagnosis. He was 61. His legacy of inspiring new generations of healthcare providers lives on through this endowed lecture series.
